

SFL65-8-10OBE

Spa Filter

The FilterLogic™ spa filter range has been designed to offer an economical and energy efficient alternative to your spa manufacturer's original replacements. Well maintained filtration in hot tubs is essential to ensure suspended dirt and debris doesn't cause damage to the spa's integral pump and heating system, it can also help prevent the build up of sludge in the internal pipework that can potentially lead to microbiological contamination. Precipitated iron, calcium, body oils, lotions and dirt are also captured and removed by the filter.

The high-flow moulded core of the filter reduces the load on the integral pump thereby maximising the life of the spa and ensuring optimal performance.

The filter lasts for up to 6 months. It is recommended that you rotate filter sets every two weeks.

Alternative filter for the models below:

- > Darlly 80651
- > Filbur FC-3960
- > Pleatco PWK65
- > Unicel C-8465

Benefits

- > Energy efficient and very cost effective
- > Simple to install and change
- > Designed in the UK
- > Effective removal of harmful contaminants
- > Filters to fit over 70 models of hot tub
- > Range of compatible hot tub disinfectants available

Specifications

Surface Area	6m ²	65ft ²
Outer Diameter	213mm	8 ³ / ₈ "
Inner Diameter	76mm	3"
Length (not including handle or end fitting)	267mm	10 ¹ / ₂ "
End Cap Fitting	OBE	
Max Temperature	42°C	107.6°F
Cartridge Life	6 months	
Weight (including box)	1128g	2.49lbs
Master Carton	6
