Water Treatment Products

No 10 TWIN - DE-ALKERLISATION AND GENERAL PURPOSE WATER FILTER SYSTEM

No. 10 Twin HM600 - IX600 Installation

If the input pressure is more than 100psi a pressure reducer must be fitted.

System Overview

Pozzani have combined a scale and scum removal cartridge - HM600, with a general purpose cartridge - IX600 to achieve efficient de-alkerlisation together with the reduction of chlorine, dissolved organics, heavy metals and a wide range of other pollutants.

This combination of cartridges should be used in hard water areas to prevent scum on hot drinks and scale in the kettle. If you drink tea or coffee without milk the drink looks much brighter and there are no stain marks on the sides of the cup.

Cartridges and Performance

HM600 Reduces the temporary hardness by ion exchange eliminating scum on hot drinks and scale in the kettle. This cartridge also removes heavy metals. The cartridge exhausts in direct proportion to the hardness of your water and the amount of water used - it is therefore advisable to use the water sparingly.

IX600 General purpose multi-stage cartridge will remove chlorine, heavy metals, dissolved organics, oestrogens etc. Dirt and suspended solids are removed down to 5 microns.

Choice of Tap - See pictures at bottom of page

Easy Installation - See picture opposite

Technical Data

Dimensions	350mm (H) 270mm (W) 110mm (D)
Max. Input Pressure	6.5 bar - 95 psi
Max. Flow Rate	3 litres/min
Cartridge Change	HM600 - On exhaustion or 6 months IX600 - 6 months

Tap Choice

Whatever your decor, Pozzani offer a choice of tap to suit, chromium (standard), various metal and ceramic painted finishes

Coloured taps - 1 white, 2 black, 3 grey, 4 red, 5 brown, 6 almond, 7 bisque.

Metal taps - 8 polished brass, 9 brushed chrome, 10 brushed nickel, 11 satin nickel, 12 polished nickel, 13 antique brass, 14 pewter, 15 brushed stainless (+£10).
